

The Grizzly Cart is a mobile recycling container, with double wall top rim for added strength. It is stackable for shipping and storage. The cart has a variety of lid options available. The powder coated steel base provides ultimate strength and durability. The steel will not warp or absorb moisture and will support heavier loads than a container with a plywood base. Casters are bolted upward securely into steel inserts so the plastic is never breached, and the casters won't break loose from the base.
